The Towers Update

April 5, 2007

Dear Towers Owner:

The pictures show the progression of The Towers, the expansion of the Hilton H2O Restaurant and the main entry connecting The Towers. The lounge will offer bar seating for 23 along with an additional 12 seats in over-stuffed furniture adjacent to the bar. Another spectacular feature as you enter H2O will be the addition of a Water Wall creating an immediate sense of relaxation as you begin your visit. A Chef's Table will also be added with seating for 8 wherein invited guests can be treated to an intimate presentation by the H2O chef's preparing specialty items only found at the "Table". This culinary adventure will soon become a must see, and do when staying at the hotel! There will also be a raised area in the center of the restaurant where a clear view of the emerald gulf waters will be observable by people creating an atmosphere where people can see and be seen while enjoying extraordinary cuisine. Throughout the restaurant and hotel you will discover an aquatic feeling with use of cool blues, emerald greens and designer touches throughout the facility. With The Towers being 80% complete we are now giving site tours every Friday beginning at 3:30 PM, so please don't hesitate to make your reservation right away for a first hand look at this most unique development! *Please note that reservations will be taken at a first come first serve basis as we have limited time for these site tours.*
